DESCRIPTION

The ROCKET TUBE is a refillable accessory for all TORNADO 2L machines, designed to create high-impact visual effects by launching Holi powder or water.

Ideal for festivals, concerts, color runs, and outdoor events, it offers a versatile, reusable, and non-pyrotechnic solution for creating spectacular stage experiences.

Filled with water, it adds a refreshing effect for the audience; with Holi powder, it delivers intense color bursts with quick and easy setup.

It is easily installed using a threaded connection and can be filled directly once mounted on the machine.
